

# MAHARASHTRA INSTITUTE OF TECHNOLOGY, AURANGABD

An Autonomous Institute Affiliated to  
Dr. Babasaheb Ambedkar Marathwada University,  
Aurangabad, Maharashtra (India)

M.Tech (Mechanical) Syllabus  
2021-22

**Chairman Board of Studies  
Mechanical Engineering  
MIT Aurangabad  
(An Autonomous Institute)**

**Chairman Academic Council  
MIT Aurangabad  
(An Autonomous Institute)**

**Maharashtra Institute of Technology, Aurangabad**  
**(An Autonomous Institute)**

**FACULTY OF SCIENCE AND TECHNOLOGY**

## Maharashtra Institute of Technology, Aurangabad (An Autonomous Institute)

### Syllabus Structure w.e.f. 2022-2023 (Choice Based Credit System)

#### M. Tech. (Mechanical Engineering)

#### Semester-I

Course Code	Course Name	Teaching Scheme (Hours/Week)			Examination Scheme and Marks							Credits			
		Theory	Tutorial	Practical	MSE-I	MSE-II	TA	ESE	TW	PR/OR	Total	TH	TW/PR	TUT	Total
MTM 101	Research Methodology and IPR	3	1	-	15	15	20	50	-	-	100	3	-	1	4
MTM 102	Machine Stress Analysis	3	-	-	15	15	20	50	-	-	100	3	-	-	3
MTM 103	Advances in Materials	3	-	-	15	15	20	50	-	-	100	3	-	-	3

(An Autonomous Institute)

<p><b>Dr. Babasaheb Ambedkar Marathwada University, Aurangabad</b> (Faculty of Science and Technology) Syllabus of M. Tech. (Mechanical Engineering) Semester-I</p>	
<p>Course Code: MTM 101 Course: Research Methodology &amp; IPR <b>Teaching Scheme:</b> Theory: 3 Hrs/week Tutorial: 1 Hr./week</p>	<p>Credits: 3-1-0 (4) Mid Semester Examination-I: 15 Marks Mid Semester Examination-II: 15 Marks Teacher Assessment: 20 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs</p>
<b>Unit-1</b>	<p><b>Research Problems and Research Design</b> Meaning of research, types of research, steps involved in research process, criteria of good research, importance of ethics in research, codes and policies for research ethics. Selection of research problem, steps involved in defining research problem, need for research design, types of research designs, basic principles of experimental design, formal and informal experimental design.</p> <p style="text-align: right;">(05 Hrs)</p>
<b>Unit-2</b>	<p><b>Sampling Design</b> Need for sampling, steps in sampling design, different types of sampling designs, sampling distributions, concept of central limit and standard error, sources of errors, population mean and proportion, sample size calculations, tests of measurements for validity, reliability and practicality.</p> <p style="text-align: right;">(05 Hrs)</p>
<b>Unit-3</b>	<p><b>Data collection, Processing and Analysis</b> Methods for collection of data, selection of data collection method, data processing operations, statistics in research, confidence level, measures of central tendency, dispersion, asymmetry and relationship. Spearman's and Pearson's coefficient of correlation, simple &amp; multiple regression analysis, analysis of variance (ANOVA), factor analysis methods.</p> <p style="text-align: right;">(08 Hrs)</p>

<b>Unit-4</b>	<p><b>Hypothesis Test and Report Writing</b></p> <p>Concept of research hypothesis, concept of testing of hypothesis, Parametric tests (z, t, F and chi-square tests), Hypothesis testing of means and correlation coefficient, Non parametric tests, significance of research report writing, types of reports, structure of the research report, steps in report writing, precautions and ethics in writing report.</p> <p style="text-align: right;">(07 Hrs)</p>				
<b>Unit-5</b>	<p><b>Introduction to IPR</b></p> <p>Origin and evolution of IPR to its present form and use, Different Tools of IPR and what is the nature of these rights, Balancing Rights and Responsibilities, Societal implications of IPR</p> <p style="text-align: right;">(05 Hrs)</p>				
<b>Unit-6</b>	<p><b>Patents</b></p> <p>Concept of inventions/discoveries, patents protect; benchmarks for patentability of inventions; Exceptions to patentability; Patenting issues in Biotechnology and computer based inventions, process to apply for patents in India and in other countries around the world, The steps to granting of a patent; Opposing grant of a patent; term of a patent; rights of a patent holder; challenging validity of a patent licensing of patent rights; using patent rights in the market place; compulsory license.</p> <p style="text-align: right;">(06 Hrs)</p>

<p><b>Dr. Babasaheb Ambedkar Marathwada University, Aurangabad</b> (Faculty of Science and Technology) Syllabus of M. Tech. (Mechanical Engineering) Semester-I</p>	
<p>Course Code: MTM102 Course: Machine Stress Analysis <b>Teaching Scheme:</b> Theory: 3 Hrs/week</p>	<p>Credits: 3-0-0 (3) Mid Semester Examination-I: 15 Marks Mid Semester Examination-II: 15 Marks Teacher Assessment: 20 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs</p>
<b>Unit-1</b>	<p><b>Theory of Elasticity:</b> Plane Stresses and plane Strain: Plain stress, Plain strain, and stress and strain at a point, differential equations of equilibrium, boundary conditions, compatibility equations, and Airy's stress function.</p> <p><b>Two dimensional problems in rectangular coordinates:</b> Solutions by polynomials, end effects, Saint Venant's principle. Two dimensional problems in polar coordinates: General equations in polar coordinates, Stress distribution symmetrical about axis, Strain components in polar coordinates.</p> <p style="text-align: right;">(08 Hrs)</p>
<b>Unit-2</b>	<p><b>Applications of Energy Methods:</b> First and Second theorems, Castigliano's theorem, applications for analysis of loaded members to determine deflections and reactions at support.</p> <p style="text-align: right;">(04 Hrs)</p>
<b>Unit-3</b>	<p><b>Theory of Torsion:</b> Torsion of Prismatic bars of non-circular cross sections, Thin walled hollow and rectangular cross sections, Saint Venant's theory, Prandtl's membrane analogy, Kelvin's fluid flow analogy, Wrapping of cross sections.</p> <p style="text-align: right;">(06 Hrs)</p>
<b>Unit-4</b>	<p><b>Experimental Stress Analysis:</b> Stress analysis by Mechanical, Optical and electrical strain gauges, strain rosette, whole field methods, Moire fringe method, brittle coatings for strain indication.</p>

**Maharashtra Institute of Technology, Aurangabad**  
(An Autonomous Institute)

	(06 Hrs)				
<b>Unit-5</b>	<b>Shear Centre and Unsymmetrical Bending:</b> Shear centre for beams of different cross sections, bending and deflections of beams subjected to unsymmetrical bending.				
	(06 Hrs)				
<b>Unit-6</b>	<b>Contact Stresses:</b> Hertz's contact stresses, expression for principle stresses, deflection of bodies in point contact, stress in bodies in point and line contacts				
	(06 Hrs)

(Faculty of Science and Technology)

Syllabus of M. Tech. (Mechanical Engineering) Semester-I

<p>Course Code: MTM103</p> <p>Course: Advances in Manufacturing</p> <p><b>Teaching Scheme:</b></p> <p>Theory: 3 Hrs/week</p>	<p>Credits: 3-0-0 (3)</p> <p>Mid Semester Examination-I: 15 Marks</p> <p>Mid Semester Examination-II: 15 Marks</p> <p>Teacher Assessment: 20 Marks</p> <p>End Semester Examination: 50 Marks</p> <p>End Semester Examination (Duration): 02 Hrs</p>
<b>Unit 1</b>	<p><b>Powder Metallurgy</b></p> <p>Development and scope of powder metallurgy, characterization of metal powders, relationship between physical properties and particle size/ shape, particle interaction and size control, powder manufacturing techniques, powder mixing and blending, dry and colloidal processing, reduction, electrolysis and atomization processes, compacting and sintering and other consolidation techniques</p> <p style="text-align: right;">(06 Hrs)</p>
<b>Unit 2</b>	<p><b>Composite Materials and their Engineering Applications</b></p> <p>Types of composites and their advantages. Types of reinforcements: glass, boron, carbon, organic and ceramic fibers, their structure, properties and processing. Types of matrix materials: polymer, metal and ceramic matrices, their structure, properties and processing. Wettability and interface bonding. Composite manufacturing and processing techniques. Introduction to Nano-composites and applications.</p> <p>Mechanical properties, thermal properties and load transfer in composites. Elastic behavior, Fracture, fatigue and creep behavior of composites. Tribological and electrical performance of composites. Degradation of composites due to various environmental conditions and corrosion resistance of composites. Designing with composites. Engineering applications of composites</p> <p style="text-align: right;">(08 Hrs)</p>
<b>Unit 3</b>	<b>Functional Materials</b>

	<p>Definition of functional materials. Light-sensitive (photochromic) materials, Temperature-sensitive (thermochoic) materials, Chemical-sensitive (chemo chromic) materials, Self-healing materials, Magnetic-sensitive materials and magnetorheological fluids, Shape-Memory Alloys, Invar alloys. Functional materials for computer memory devices and optical media storage devices, Multiferroic materials and their applications in sensors and actuators, Carbon based materials: CNTs, CQD, Fullerenes, Graphite, RGO, GNP.</p> <p style="text-align: right;">(06 Hrs)</p>				
<b>Unit 4</b>	<p><b>Application of Nanomaterials and Nanocomposites</b></p> <p>Applications in Biomedical, Solar and Energy storage, Biomedical-Drug delivery, Bone replacement; Sensors – gas sensor, Metal adsorption and recovery, Bio-molecule detectors; Energy storage and conversion - Super capacitors, Solar cells, Energy generators; Electronics; Self-cleaning &amp; Self-healing paints, Nano-engineering of cement-based materials, Agricultural Nanotechnologies.</p> <p style="text-align: right;">(06 Hrs)</p>				
<b>Unit 5</b>	<p><b>Materials Characterization,</b></p> <p>Scope and methods used for materials characterization. Need, Working principle, Components, Description and Applications of different characterization techniques such as Microscopy, Compositional analysis, Chemical analysis, Structural analysis, Thermal analysis, Mechanical property evaluation, Fractography.</p> <p style="text-align: right;">(06 Hrs)</p>				
<b>Unit 6</b>	<p><b>Materials Recycling and Waste Management</b></p> <p>Recycling of different classes of materials, Solid Waste Regulations, Waste generation, Waste characterization, Physical properties of Waste, Waste separation and processing: Composting, Landfills, Incineration, etc.</p> <p style="text-align: right;">(04 Hrs)</p>

<b>Dr. Babasaheb Ambedkar Marathwada University, Aurangabad</b> (Faculty of Science and Technology) Syllabus of M. Tech. (Mechanical Engineering) Semester-I	
Course Code: MTM104 Course: Advanced Thermodynamics. <b>Teaching Scheme:</b> Theory: 3 Hrs/week	Credits: 3-0-0 (3) Mid Semester Examination-I: 15 Marks Mid Semester Examination-II: 15 Marks Teacher Assessment: 20 Marks End Semester Examination: 50 Marks End Semester Examination (Duration): 02 Hrs
<b>Unit 1</b>	<b>Equation of State:</b> State postulate for simple system and equation of state, ideal gas equation, deviation from ideal gas, equation of state for real gases, generalized compressibility chart, law of corresponding state. <div style="text-align: right;">(06 Hrs)</div>
<b>Unit 2</b>	<b>Law of Thermodynamics:</b> Equation of the first law of the thermodynamics, application of the first law to Flow & Non Flow system, reversible & irreversible processes with ideal and real gases, Statement of second law, Generalised Carnot cycle, Entropy & Exergy, Free energy and tied energy, Thermodynamics potential functions, Availability, Losses of maximum useful work, Nerst's heat theorem. <div style="text-align: right;">(06 Hrs)</div>
<b>Unit 3</b>	<b>Changes in States of Gases at their Transferences:</b> Throttling process, Joule Thomson effect, Temperature of braking, Mixtures of ideal & real gases, Mixing of flowing gases, mixing of gases at constant volume. <div style="text-align: right;">(06 Hrs)</div>
<b>Unit 4</b>	<b>Thermodynamic Property Relations:</b> Partial differentials, Maxwell relations, Clapeyron equation, general relations for $du, dh, ds$ and $C_v$ and $C_p$ , Joules Thomson coefficient, change in enthalpy, internal energy and entropy of real gases. <div style="text-align: right;">(06 Hrs)</div>
<b>Unit 5</b>	<b>Chemical Thermodynamics</b> chemical reaction- fuels and combustion, enthalpy of formation and enthalpy of combustion, first law analysis of reacting systems,

## Maharashtra Institute of Technology, Aurangabad (An Autonomous Institute)

	adiabatic flame temperature chemical and phase equilibrium- criterion for chemical equilibrium, equilibrium constant for ideal gas mixtures, some remarks about $K_p$ of ideal gas mixtures, fugacity and activity, simultaneous relations. Gibb's phase rule, third law of thermodynamics, Nerst heat.				
	(06 Hrs)				
<b>Unit 6</b>	<b>Gas Mixtures-</b> Mass and mole fractions, Dalton's law of partial pressure, Amagat's law, Kay's rule				
	<b>Statistical Thermodynamics-</b> Fundamentals, equilibrium distribution, significance of Lagrangian multipliers, partition function for Canonical Ensemble, partition function for an ideal monatomic gas, equipartition of energy, Bose Einstein statistics, Fermi-Dirac statistics.				
	(06 Hrs)

(Faculty of Science and Technology)

Syllabus of M. Tech. (Mechanical Engineering) Semester-I

Course Code:MTM111

Credits: 0-0-1

Course: Lab-I

Credits: 1

**Teaching Scheme:**

Practical/Oral Exam: -NA

Practical: 2 Hrs /week

Term Work: 25 Marks

Lab work consists of two parts as below

**Part A:** The candidate will deliver an industrial case study in front of two examiners (one internal and other appointed by the principal)

**Part B:** Assignments shall be based on five theory subjects of semester (one on each course). The marks will be awarded by the concerned course teacher.

**Maharashtra Institute of Technology, Aurangabad**  
**(An Autonomous Institute)**

**Dr. Babasaheb Ambedkar Marathwada University, Aurangabad**

(Faculty of Science & Technology)

Syllabus of M. Tech. (Mechanical Engineering) Semester-I

Course Code:MTM112

Credits: 0-0-1

Course: Lab-II

Term work: 25 Marks

**Teaching Scheme:**

Practical: 02 Hr/week

**Course Content:**

The lab work consists of the assignments/experiments related to

Introduction to ANSYS Software

1. Modelling of structure using line element
2. Modelling of two and three dimensional machine components.
3. Mesh generation of solid part
4. Static structural analysis of machine component
5. Transient structural analysis of machine components
6. Steady state thermal analysis of machine components
7. Buckling analysis of machine components
8. Modal analysis of machine components

**Dr. Babasaheb Ambedkar Marathwada University, Aurangabad**

(Faculty of Science & Technology)

Syllabus of M. Tech. (Mechanical Engineering) Semester-I

Course Code:MTM113

Credits: 0-0-1

Course : Lab-III[MATLAB]

Term work: 25 Marks

**Teaching Scheme:**

Practical: 02 Hr/week

**Course Content:**

The lab work consists of the assignments/experiments related to

Introduction to MATLAB Software

1. MATLAB window: Command window, Workspace, Command history, setting directory, Working with the MATLAB user interface
2. Basic commands, Assigning variables, Operations with variables
3. Data Types: Character and string, Arrays and vectors, Column vectors, Row vectors
4. Basic Mathematics: BODMAS Rules, Arithmetic operations, Operators and special characters, Mathematical and logical operators, Solving arithmetic equations
5. Operations on matrix: Crating rows and columns Matrix, Matrix operations, Finding transpose, determinant and inverse, Solving matrix
6. Other operations: Trigonometric functions, Complex numbers, fractions, Real numbers, Complex numbers
7. Plots: Plotting vector and matrix data, Plot labelling, curve labelling and editing, 2D plots: Basic Plotting Functions, Creating a Plot, Plotting Multiple Data Sets in One Graph, Specifying Line Styles and Colours, Graphing Imaginary and Complex Data, Figure Windows, Displaying Multiple Plots in One Figure, Controlling the Axes

Syllabus of M. Tech (Mechanical Engineering), Semester- II

Course Code:MTM152

Course: Lab V (CFDSoftware)

**Teaching Scheme:**

Practical: 2 Hrs/week

Credits: 0-0-1 (1)

Term-work: 25 Marks

The set of tutorials designed to provide the student with the necessary tools for using sophisticated commercial Ansys fluent CFD software. A set of laboratory tasks will take the student through a series of increasingly complex flow and heat transfer simulations, requiring an understanding of the basic theory of computational fluid dynamics (CFD). At the end of the course each student will have to complete a mini project.

1. Perform numerical analysis on flow through pipe with varying Reynolds Number.
2. Calculate hydrodynamic length and boundary layer thickness for pipe flow numerically
3. Calculate lift and drag co-efficient for a cylinder by using numerical analysis.
4. Calculate variation of lift and drag co-efficient for an airfoil with varying angle.
5. Understand the behavior of Creeping flow by numerical simulation.
6. Case study based on course of CFD

**Maharashtra Institute of Technology, Aurangabad**  
**(An Autonomous Institute)**

**Dr. Babasaheb Ambedkar Marathwada University, Aurangabad**

Syllabus of M. Tech. (Mechanical Engineering), Semester-II

Course Code:MTM153

Course: Lab-VI

[Advanced MATLAB Programming]

**Teaching Scheme:**

Practical: 02 Hr/week

Credits: 0-0-1

Term work: 25 Marks

**Course Content:**

The lab work consists of the assignments/experiments related to

Programming in MATLAB Software.

1. GUI Design: Introduction of Graphical User Interface, GUI Function Property, GUI Component Design, GUI Container, Writing the code of GUI Call back.
2. MATLAB Programming: Automating commands with scripts, Writing programs with logic and flow control, Writing functions, Control statement Programming, Conditional Statement Programming, Examples.
3. Loops and Conditional Statements: Control Flow Conditional Control if, else, switch Loop Control for, while, continue, break Program Termination return
4. Functions: Writing user defined functions, Built in Function, Function calling, Return Value, Types of Functions, Global Variables
5. MATLAB Toolbox: Optimization Toolbox, Fuzzy logic Toolbox, Global Optimization Toolbox, Neural Network Toolbox, Statistics and Machine Learning Tool Box.
6. Introduction to Simulink

**(An Autonomous Institute)**

**Dr. Babasaheb Ambedkar Marathwada University, Aurangabad**

(Faculty of Science & Technology)

Syllabus of M. Tech. (Mechanical Engineering), Semester-II

Course Code: MTM 154

Credits: 0-0-2

Course: Mini Project

Practical /Oral : 50 Marks

**Teaching Scheme:**

Practical: 4 Hr./week

Course Content:

A group of students or individual students are required to choose a topic of interest. To train students in identification, analysis, finding solutions and execution of live engineering and managerial problems. The course content of the mini project shall be from emerging / thrust areas, topics of current relevance having research aspects or shall be based on industrial visits.

Students can also choose live problems from manufacturing organizations as their mini project.

At the end of the semester, the students should submit a report and appear for End Semester Examination.

End Semester Examination will be assessed by Examiner appointed by Examination Cell and internal guide. Mini Project will have end Semester examination of 50 marks.

# Maharashtra Institute of Technology, Aurangabad (An Autonomous Institute)

## Dr. Babasaheb Ambedkar Marathwada University, Aurangabad

(Faculty of Science & Technology)

Syllabus of M. Tech.(Mechanical Engineering), Semester-III

Course Code: MTM 201

Course: MOOC Course

**Teaching Scheme:**

Online Course

(Minimum 12 Weeks)

Credits: 3-0-0

End Semester Exam: 100 Marks

It is mandatory for the student to complete one MOOC course related to the program of study. The student will have to complete the MOOC course which will be available on the SWAYAM portal (Free online education portal). Registered MOOC courses should not have similar or overlapping content to that of the regular courses in the curriculum of the program. The credits can be given to the students after successful completion of the MOOC course of 12 weeks or more.

The credits will be transferred by the evaluation in terms of assignments or examinations or viva-voce. In case the student is unable to clear MOOC Course examination, the student will have to appear for an Institute-level examination for the respective MOOC course.
